EXPERIENCE

Associate Project Manager - W3S Solutions

January 2026 – Present

- Managing and coordinating software and website development projects from planning to deployment.
- Communicating with clients to gather requirements, provide project updates, and ensure customer satisfaction.
- Collaborating with development, UI/UX, and QA teams to maintain smooth project workflows.
- Conducting manual testing and quality assurance to identify bugs and improve system reliability.
- Assisting in UI/UX review processes to enhance user experience and interface usability.
- Monitoring project timelines, task progress, and team performance to ensure timely delivery.
- Supporting Laravel-based web application projects and coordinating issue tracking and resolutions.
- Preparing project documentation, reports, and task management updates for internal teams and clients.

Intern Project Manager - W3S Solutions

August 2025 – January 2026

- Assisted senior project managers in handling software development projects.
- Participated in client communication and requirement gathering sessions.
- Supported QA and testing activities to improve application performance and functionality.
- Worked closely with developers and designers to ensure project requirements were properly implemented.
- Helped monitor project schedules, tasks, and issue reporting processes.

PROJECTS

Tourist Management System

MongoDB, Express.js, React.js, Node.js, GitHub, VS Code, Postman

GitHub Link - https://github.com/shehara14/MERN-Attorney-Management-System.git

Implemented a dynamic booking system allowing tourists to create, update, and cancel reservations with real-time checks on vehicle and driver availability based on selected dates and times. Ensured input validation and accurate assignment of drivers and vehicles. Also supported admin-side reporting to analyze booking trends, revenue, and cancellations.

Attorney Management System

MongoDB, Express.js, Reaact.js, Node.js, GitHub, VS Code, Postman

GitHub Link - https://github.com/shehara14/MERN-Attorney-Management-System.git

Developed the Attorney Management component of a MERN-based web application. Responsibilities included managing law firm and lawyer profiles, user role handling, secure password updates, document approval workflows, and building a metrics-driven dashboard. Focused on streamlining internal legal operations within the broader system.

Skill Sharing Web Application

Spring Boot, Thymeleaf, MySQL, Bootstrap, GitHub

GitHub Link - https://github.com/shehara14/SkillCrafter-Web-App.git

Contributed to the development of user engagement features, including comment, like, and view management. Implemented functionality for adding, editing, deleting, and moderating comments, along with view tracking to measure content reach. Enhanced interactivity and collaboration within the crafting community.

Online App Store

HTML, CSS, PHP, JavaScript, SQL Server

Developed a web-based app store platform where users can browse, search, and download applications. Implemented features such as user authentication, app categorization, reviews and ratings, and admin panel for managing app listings. Focused on creating a user-friendly interface and secure, dynamic data handling.

Mind Relaxing Mobile App

Figma,Kotlin, XML, Android Studio

GitHub Link - https://github.com/shehara14/RelaxON-Android-Mobile-App.git

Designed and developed RelaxOn, a wellness-focused Android app offering personalized meditation schedules, calming music, breathing exercises, and a gallery of peaceful images. Included profile management, cross-device syncing, and a soothing, user-friendly interface to enhance mental relaxation and overall user well-being.

Multi-Feature Productivity Mobile App

Kotlin,XML,Android Studio

GitHub Link https://github.com/shehara14/Multi-Feature-Productivity-Mobile-App.git

DailyDoer is an intuitive Android Productivity app designed to help users to stay organized and productive. With a user-friendly interface, Reminders with Notifications,Handy Widget,Task Management and Timer with alarm.
